

Lecture 3 – Present simple (2) – Using the PC

An old and obsolete PC

A graphical user interface (GUI)

A technical difficulty

Inglese <con pronuncia facilitata indicativa>

Italiano

I own a very old computer, but at least it still works...!
<ai oun e veri old compiutar, bat et liist it still uerks>

Posseggo un computer molto vecchio, ma almeno funziona ancora ...!

My Personal Computer (PC) is very useful.
<mai personal computar (pii-sii) servs mi uell>
I read the emails, I browse the Web, and I print my homeworks
<ai rid de imeils, ai braus de ueb, end ai print mai homuorks>

Il mio computer personale (PC) è molto utile.

Leggo la posta elettronica, navigo sulla Rete, e stampo i miei compiti

However, it often gives me error messages.
<aueuar, it oftem ghivs mi error messagis >
I understand very little of what it says
<ai anderstand veri littol ov uot it seis >

Però mi dà spesso dei messaggi di errore.

Io capisco molto poco di quello che dice

It says that the mailbox is full. I empty the mailbox often
<it seis det de meilbox is full. ai empti de meilbox often >

Dice che la casella di posta è piena. Io svuoto spesso la casella di posta

Now it seems completely stuck
<nau it is complitly stak>
Maybe it is better to turn it off and to go to bed!
<meibi it is betta to tern it off and tu go to bed>

Ora sembra completamente bloccato

Forse è meglio spegnerelo e andare a letto!

<i>infinite</i>	<i>past</i>	<i>participle</i>	<i>italiano</i>
to own	owned	owned	<i>possedere</i>
to work	worked	worked	<i>lavorare, funzionare</i>
to read	read	read	<i>leggere</i>
